

# NURSE CALL SYSTEM

## IP-8000 SERIES NURSE CALL

The IP-8000 is totally integrated Internet Protocol system that allows for both LAN and WAN connectivity. With the confidence in communication that IP offers, Questek have built the most robust and reliable nurse call system in the market.

With the introduction of the IP-8000 system some greater flexibility and capability than ever before. The system has been designed with usability in mind and although there are many advanced features the daily operations, such as reports and analysis are easier than ever. The IP-8000 is the future of nurse call and on site communications.

# INTEGRATED HEALTHCARE SOLUTIONS

INTEGRATING NURSE CALL WITH COMMUNICATION

DESIGNED TO MEET THE NEEDS OF  
AGED CARE FACILITIES & HOSPITAL  
NOW AND INTO THE FUTURE

## AT THE BEDSIDE

Call stations for low & high care environments

British Standard (B2000 ALTO DIVINE)

Australian Standard

Questek offers an extensive range of nurse call stations suitable for low and high care environments.

- Large bright buttons with softer backing colours to suit most modern decors.
- Buttons with tactile and audible feedback.
- Polyester overlays that are easy to clean
- Do not require dip sterilizing.
- Available in both vertical and horizontal mounting to AS3112 ( for Australian Standard )

Pendants & peripherals

- Call pendants with optional bed light switch.
- Low dexterity paddle pendants.
- Personal radio pendants.

Sensors under the mattress

As the pioneers in dementia care monitoring systems, our smart sensor based technology helps increase the quality of care for residents with dementia.

- Suitable for patients/residents with dementia who are unable to operate a manual call station.
- Reduce the risk of falls! Bed exit sensor installed under the mattress for greater accuracy.
- Bed wet sensor for advanced continence monitoring & assessment.
- Dramatic reduction in staff "on rounds".

## IN THE ENSUITE & COMMON BATH

Call stations designed to be splash resistant, suitable for mounting in wet areas or bath rooms.

- Ceiling or wall mounted call station suitable for showers where a pull cord station is required.
- Pull cords feature a safety release force and optional release link

## COMMON DINING & LOUNGE AREAS

Versatile call & assist stations suitable for common dining and lounge areas. Optional pendant socket for connecting peripherals e.g. short range radio pendant receivers.

## AT THE NURSE'S STATION

Monitoring & management software

- Intuitive touch screen operation.
- Monitoring of nurse calls with optional resident photo identification.
- Send a short message to DECT phones, pagers and other communications devices.
- Reporting of alarms and response times.

## CARE MANAGEMENT SOFTWARE

Questek CareView Clinical is our latest care management solution for aged care that assists you with ACFI documentation & accountability.

Questek CareView Clinical is an integrated software solution to meet your aged care documentation and accountability needs. Our standard package provides powerful management and reporting tools for over 50 assessments, forms and ongoing care management charts. It can help you maintain the documentation you need to justify your ACFI funding claims.

- Capture progress notes, care plans, assessments, charts, and other vital management forms in electronic form.
- Powerful analysis & reporting capabilities on key aspects of aged care management.
- Supports ACFI funding instrument.

## RADIO PENDANTS

Questek have a range of radio pendant systems designed for both Resident & Staff safety. Whether pin point accuracy or simple pendant identification is required the Questek system is simple, flexible and powerful.

- Pinpoint duress for high security applications e.g. psychiatric units.
- Low security units with pendant ID for mobile nurse call.
- Full campus coverage.
- Pendant can be patient call or staff duress.
- High security man down and rip cord feature.

## MATV

Questek can help you provide Foxtel integration or onsite video services for your residents. Our systems also allow for church service integration, information channels to inform residents of facility activities and even the latest movies for residents.

It's the advanced features and high picture quality of the Questek system that sets us apart.

## CCTV

Questek provides effective electronic security solutions specifically tailored to our customers' needs. Questek's range of sophisticated electronic systems includes: intruder alarm systems, access control systems, video surveillance and systems integration.

Questek have been designing and installing CCTV systems for over 15 years and it is with this experience our staff can design the right system for your facility. Whether you require one camera, full site or multi-site coverage, our team can tailor the correct solution for you.

## ON SITE & WIDE AREA COMMUNICATION

DECT cordless telephony

VOCERA™ integration

Pager LX4+

## ACCESS CONTROL

Patient wandering and absconding is a major problem in the modern Aged Care Facility. With more residents suffering from different level of Dementia it has become very important to maintain a safe environment that is homelike yet secure.

Residents with dementia can become easily confused and disorientated if they leave the confines of the facility; therefore access control has become far more important in Aged Care than ever before

Although Resident security is paramount, staff safety and efficiency is also key to the continued operations of any aged care facility.

- Keypad or Prox card door control.
- Alarms if the door is open too long.
- Network reporting of doors access.
- Software control of users cards or pin numbers.
- Integration with the fire system so that door release on fire alarm.
- Battery backed up for extra security.
